EWEC-LAC is composed of

Together we can achieve health equity

EVERY WOMAN
EVERY CHILD

FOR HEALTHY AND EMPOWERED WOMEN,
CHILDREN AND ADOLESCENTS
LATIN AMERICA AND THE CARIBBEAN

What is EWEC-LAC?

Every Woman Every Child Latin America and the Caribbean

is the regional inter-agency coordinating mechanism for the adaptation and implementation in the region of the *Global Strategy for Women's, Children's and Adolescents' Health* in the Americas, using an equity-based approach.

EWEC-LAC works with countries in Latin America and the Caribbean to address social inequities in women's, children's and adolescents' health.

How does EWEC-LAC support countries?

EWEC-LAC supports countries in reducing social inequities in health and meeting the specific targets and goals set forth in the *Global Strategy for Women's, Children's and Adolescents' Health*.

- 1. Measuring and monitoring** social inequalities in health affecting women, children and adolescents;
- 2. Addressing** social inequities in health using evidence-based policies, strategies and interventions; and
- 3. Advocating** to keep women's, children's and adolescents' health equity on top of the political and public agenda.

Did you know that...

- *approaches focusing on the poorest and most marginalized populations have proven to be the most practical and cost effective way to meeting health-related global goals?*
- *progress made toward the Global Strategy means progress made toward the SDGs?*
- *health efforts that do not pursue social equity in health as a specific strategy run the risk of increasing, rather than decreasing, social inequities in health?*
